Years for Many People Who Were Out in Small Boats in the Storm.
PEORIA, July 13.—Up to 2 o'clock this morning eight bodies had been recovered from the wreck of the steamer Frankie Folson, lost in last night's storm, and the search still continues. The list of known dead, so far, is as follows:
Mrs. Frank Folson and daughter Cora.
Mrs. Henry Dunsicker.
John Anderson.
Miss Corby.
Mrs. M. Wilke.
Maud Ford.
Two unidentified, one a man and the other a woman.

At the conference this morning between the Sub-Committee of the Notification Committee, appointed by the Chicago Democratic Convention, and the Sub-Committee of Mayor Grant's Auxiliary Committee of One Hundred, the plan suggested by the former committee to give candidates Cleveland and Stevenson official notices of their nominations at a public meeting was approved.

The first evening concert ever given in East River Park will take place in that parkable resort at 8 o'clock tomorrow evening, in accordance with the order of President Paul Dana, of the Board of Park Commissioners. The concert was ordered as an experiment to satisfy the Commissioners whether or not evening concerts at East River Park were feasible, as has been urged by the Evening World, backed up by a monster petition of residents in the neighborhood of the park.

Col. Parlin, of the Fourth Infantry, who is in command of the Federal troops at Warden, near the scene of the trouble, telegraphed last night that affairs were in a very bad condition. Acting on this information, Gen. Schofield this morning ordered the following additional troops to the Couer d'Alene district:
Four companies of Infantry from Fort Spokane, Washington; a troop of cavalry and six companies of Infantry from Vancouver Barracks, Washington.

THE VACANT CHAIR.

ALL NEW YORK SWELTERING.
82 Degrees of Humidity, Added to Intense Heat.
Showers and Slightly Cooler Weather Promised for To-Night.

DEAD UNDER THE GLACIER.
Mournful Search for More Bodies at St. Gervais-les-Bains.
Marvellous Escapes Recorded—Aid for Bereaved Families.

STILL SEEKS A CHAIRMAN.
Nine Famous Republicans Have Refused the Position.
President Harrison's Difficulty in Finding a Campaign Manager.

It is believed that six more bodies will be found. The river bank presents an animated appearance. Grief-stricken citizens of Peoria are in quest of missing relatives, and many of them are nearly frantic. Sam Sutton, one of the rescued, says he is sure the following persons were drowned: Misses Fanny and Ann Poebel, William Lipberger, Mr. John Wiley, Mr. Abraham, Miss Mary Fitch, Mrs. Fred Fisher, Miss Cora Fisher, Mrs. Dunsicker and two girls unknown, and Mr. Beebe. Those on the boat who have been brought to the shore are certain that there were at least eighteen drowned.

The gentlemen representing the local committee were Mayor Grant, ex-Secretary W. C. Whitney, chairman Samuel D. Babcock and David McGuire. Mr. Whitney stated that the conference was called for the purpose of ascertaining the views of the Notification Committee on the popular plan for a public reception. The members of the Sub-Committee agreed that it was a good idea and they promptly approved it.

President Dana and Commissioners Gallup and Tappan were present at this morning's meeting. When the matter of evening concerts came up President Dana said that after consultation with Bandmaster H. A. Hall, of the Old Guard Band, which has the contract to play at East River Park, and several of the musicians, he was convinced that it was practically impossible to give evening concerts at the park because the musicians had engagements elsewhere which could not be broken.

Gov. Willey wanted more troops. Boise City, Idaho, July 13.—Federal troops are now moving towards the scene of the trouble in the Northern Idaho mines. The telegraphic correspondence between Gov. Willey, President Harrison and Gen. Schofield to-day. On receipt of the orders from Washington Gen. Rucker, at San Francisco, telegraphed Gov. Willey that he had ordered the commanding officer at Fort Sherman to move at once with all available forces to the scene of disturbance and to report to the Governor.

The heat today is even more intense and oppressive than that of yesterday, and all indications this morning point to the hottest day of the season in New York and its vicinity. The mercury began to climb as soon as the sun had poked his head over the house tops. Later in the forenoon, when the fierce rays of the sun began to get in their work on the baking pavements, the hot air rose from them like that of an oven.

The bodies recovered are torn and mangled most horribly. The scene at St. Gervais is a most pitiable one. The officials are doing everything in their power to facilitate the work of rescue, and are themselves foremost in the work. The bodies recovered are torn and mangled most horribly. The scene at St. Gervais is a most pitiable one. The officials are doing everything in their power to facilitate the work of rescue, and are themselves foremost in the work.

Republican politicians do not hesitate to say that the President has made a mess of it. It will be difficult, they think, if he continues to exercise his dictatorial policy, to find a chairman for the National Committee to succeed Lawyer Campbell. The story is told that the President did not even consult the members of the Committee in the selection of its officers, and they first learned the names of these officers through the press. It is believed that the President is inclined to resent this arbitrary rule, and that in this way it has been almost impossible for Mr. Harrison to induce competent men to assist in the management of his campaign.

When the storm broke the lake and river were filled with every description of boat. There are over two hundred pleasure boats at the yards and so far only ninety-six of them have been recovered. John Bard, a salesman, was caught about a hundred yards from shore and had great difficulty in getting ashore. While standing in the shelter of a house he saw several small boats go whirling down the river, and there is but little doubt that their occupants have found a grave in the angry waters.

After the meeting ex-Secretary Whitney said that the local Sub-Committee had secured the refusal of Madison Square Garden for the evening of July 20 and he would recommend to the full Committee to-morrow that it be hired for the notification ceremonies. He brought a pair of about forty from Peoria to see Peoria's Last Days of Pompeii. After the exhibition they pulled out, and when in the middle of the river the storm struck them in all its fury with scarcely a sign of warning. He attempted to head the steamer towards the shore, and as he did so a terrific gust of wind struck the craft and he kept it over in nineteen feet of water.

Superintendent of Parks Parsons told an Evening World reporter that all arrangements for the concert to-morrow evening had been completed. Lamps for the musicians have been placed in the band stand, and the lawn surrounding it will be thrown open to the throngs of people that will attend. Capt. Christopher Columbus Collins, of the park police, anticipates an attendance of July 15,000 people, and has arranged for a detail of thirty extra policemen to preserve order. In consideration of thousands of people who will be present, the park police will be on duty all night, and will be followed by the cavalry sent from the city.

Gov. Willey will place Shoshone County under martial law as soon as the legal requirements can be completed, the proper officials having failed so far to give the Governor the notice required by the Constitution. WARDEN, Idaho, July 13.—The day was quiet here last night, but it was the quiet of determination and desperation. The strikers had a day of uninterrupted victory. They had only to demand and receive, and as a result they are in complete possession of the mines and mills of the Bunker Hill and Alder and Sierra Nevada mining companies.

The whole country east of the Rocky mountains is pretty much heated up today, and would take a cold wave some day to travel to the coast, now, if one were visible. The fact is, the country is so hot that it is almost impossible to travel. The temperature at St. Louis is 82, and at Chicago it is 80. The humidity is such that it is almost impossible to breathe. The humidity is such that it is almost impossible to breathe.

Among the victims was a Dane, who escaped unhurt from the terrible explosion on the steamer Mont Blanc at Ouchy on the Lake of Geneva last Saturday, when twenty-six persons were killed. As the harbor of Geneva, which was swept out of existence by the sliding glacier, thirty-five persons were killed. Arrangements are now being made for the funerals. Subscriptions are being raised for the benefit of the women and children who have been deprived of those upon whom they depended.

Some marvellous escapes from a most horrible death are reported. Fifteen persons who were staying at the baths were saved by the presence of mind of the resident physician, who, hearing the roar of the coming water and debris, opened the doors of the bedrooms nearest to him and called to the occupants to get to the rooms to flee for their lives. The physician led them through a window and up the mountain side to a place of safety.

Now and then an inverted small boat would float ashore. These were quickly righted by men, who would light for possession, springing into the little craft they would push off, determined to save their dear ones, only to find that they were helpless in the sea, for the boats were blown to pieces by the waves. The storm abated somewhat at the morning, but the rescuing parties were still unable to get to the shore. The boats were blown to pieces by the waves. The storm abated somewhat at the morning, but the rescuing parties were still unable to get to the shore.

The bodies of those killed were so wedged that the cars had to be backed up before the remains could be secured. The killed are George A. Welsh, of 122 East Forty-eighth street, New York; T. L. Frank and wife, of 709 Union street, Brooklyn, and Miss Tessie McCoy, of 25 Montgomery street, New York. All the killed except the latter were terribly mangled.

Right Rev. Mgr. J. M. Farley, pastor of St. Gabriel's church in East Thirty-seventh street, called for Europe this morning on the steam ship City of New York. He will spend the greater part of his vacation in Ireland, but will also visit Rome and have an audience with the Pope. There was a large crowd of his parishioners at the dock to see him off, and many of them followed him down the bay as far as hands look on a tug.

Other Steel and Iron Workers Will Support the Homestead Men.
Their Alternative of a Peace Conference Refused by the Carnegies.

Chief Industries of the State Likely to Suffer from a Sympathetic Strike.

The Situation at Homestead—Mill Men and Soldiers Fraternizing.

PITTSBURGH, Pa., July 13.—The attitude of H. C. Frick, acting for Carnegie, Frick & Co. in the matter of the trouble at Homestead, has antagonized all the labor organizations of Western Pennsylvania, and a big sympathetic strike of all the iron and steel workers in the State is now among the possibilities. Such a move would affect from 15,000 to 20,000 workmen, and it would also paralyze the iron and steel trade of the State and inflict incalculable loss upon the big corporations that control these industries.

The object of such a strike would be, of course, to compel other millmen to join the men as against the Carnegies and secure their influence for arbitration as a means of settling the Homestead trouble. The first steps in this direction were taken last night at a mass-meeting here of the men employed in the Pittsburgh mills. There were about 3,000 men at the meeting, many of them workers in Carnegie's Pittsburgh mills. Resolutions were unanimously adopted declaring that unless Mr. Frick receded from his arbitrary position and consented to a conference with representatives of the Amalgamated Association on the Homestead difficulty before noon to-morrow, the men at the Lawrenceville mills go on strike.

If the men in these mills go out they will seek the active co-operation of the employees of the Beaver Falls, Bessemer and Keystone Bridge Company's mills. The latter have been exhibiting signs of uneasiness and could, it is thought, be easily induced to join in a sympathetic strike. Other mill men in all parts of the State could then be depended upon to support the movement. The mills at Lawrenceville, which is a suburb of Pittsburgh, give employment to between 3,000 and 4,000 men. The Beaver Falls Mills, located about thirty miles north-west of Pittsburgh in the town of Beaver Falls, employ about 3,500 men. At the Bessemer Mills, which are situated between the towns of Braddock and Bessemer, across the Monongahela River from Homestead and about nine miles east of Pittsburgh, about 5,000 men are employed. The Keystone Bridge Company's works are in Pittsburgh and give employment to about 1,600 men. These are the largest concerns likely to be affected by a sympathetic strike.

A committee was appointed at the mass-meeting to wait upon Mr. Frick and notify him of the action taken. One of its spies, however, had previously carried the news to him, and to gain time he left his office before the Committee arrived. Last evening he was before the Congressional investigating Committee and could not be reached. It is expected that he will spend most of his time to-day with that Committee. The Committee finally notified P. R. Dillon, superintendent for Mr. Carnegie of the Law-

Now and then an inverted small boat would float ashore.
